GALAXY CAMP

The first innovative inclusive creative camp in Ukraine, which uses innovative methods of psycho-social rehabilitation of vulnerable children based on their creative team-work.

SOCIALIZATION AND PSYCHOLOGICAL REHABILITATION OF CHILDREN:

Since 2004 Association CHILD.UA organizes rejuvenating and creative camps for children who have found themselves in difficult life circumstances.

The GALAXY CAMP project is designed to help with the socialization and adaptation of displaced children, children from orphanages, state boarding schools and children with disabilities.

Our experts developed an innovative method of psycho-social rehabilitation of children through art, creative development and teamwork.

The creative camp is aimed at individual work with each of the participants and group therapy of psychological traumas of children of different age categories.

Twice a year, the creative camp gathers 200 participants from all over Ukraine. In addition to children for socially unprotected categories, children from normal families and children with hearing impairments are involved in the camp.

The project creates a friendly and very creative environment where children do not feel their differences. This contributes to their development, effective psycho-social rehabilitation, successful team-working skills and empathic patterns of behavior.

The team of psychologists and teachers, as well as professional actors, sportsmen, musicians, vocalists and choreographers are working with children to help them realize their unique creative project.

Camp tutors are also famous Ukrainian performers and musicians. Children have the opportunity to get acquainted with Ukrainian stars and learn from them.

The majority of GALAXY CAMP participants are winners of the international children's charity festival "Follow your dream".

Participation in the camp has a positive impact on children that is evidenced in their improved academic performance.

Some campers return to the project to become part of the tutors team as volunteers in order to help other children to discover their creative potential and find themselves on the way to a successful future next year.
